

Medica Drug List

PLEASE READ: THIS DOCUMENT CONTAINS INFORMATION ABOUT THE DRUGS WE COVER IN YOUR PLAN. PLEASE NOTE, HOWEVER, THAT CERTAIN DRUGS ON THIS LIST MAY BE EXCLUDED UNDER YOUR SPECIFIC PLAN DESIGN. PLEASE REFER TO YOUR COVERAGE DOCUMENTS TO DETERMINE SPECIFIC BENEFIT LEVELS.

PLEASE NOTE: This list is subject to change and is not all-inclusive. Please review this document and contact Medica Customer Service with questions.

The coverage level for prescription drugs is generally higher when a member receives them at an in-network pharmacy, and, for some plans, members must use network pharmacies to receive prescription drug benefits. Plan terms vary and members should consult their benefit plan documents for specific coverage information.

Prior authorization may be required to obtain coverage for certain drugs on this list. Brand name drugs are listed in CAPITAL letters. Generic drugs are listed in *italicized* lower case letters. The coverage level of brand name drugs may change when a generic equivalent or interchangeable biosimilar becomes available.

If you have questions, please call the Medica Customer Service number listed on the back of your ID card.

What is a Drug List?

The Medica Drug List is comprised of drugs that meet the medical needs of our members and have proven safety and effectiveness. It includes both brand name and generic drugs. The drugs on this list have been approved by the Food and Drug Administration (FDA). A team of physicians and pharmacists meets regularly to review and update the list. Your doctor can use this list to select medications for your health care needs, while helping you maximize your prescription drug benefit.

Are both brand name and generic drugs on the list?

Yes. The Drug List includes brand name and generic drugs from most therapeutic classifications.

The terms “generic” and “brand name” are used in the health care industry in different ways. To better understand your coverage, please review the following:

Generic: A drug: (1) that contains the same active ingredient as a brand name drug and is chemically equivalent to a brand name drug in strength, concentration, dosage form and route of administration; or (2) that Medica identifies as a generic product. Medica uses industry standard resources to determine a drug’s classification as either brand name or generic. Not all products identified as “generic” by the manufacturer, pharmacy or your provider may be classified by Medica as generic.

The Drug List includes preferred generic prescription drugs and generic prescription drugs. These prescription drugs are your lower copayment or coinsurance options. Consider a preferred generic or generic covered prescription drug if you and your provider decide such a prescription drug is appropriate for your treatment.

Brand: A drug: (1) that is manufactured and marketed under a trademark or name by a specific drug manufacturer; or (2) that Medica identifies as a brand name product. Medica uses industry standard resources to determine a drug’s classification as either brand name or generic. Not all products identified as “brand name” by the manufacturer, pharmacy or your provider may be classified by Medica as brand name.

Preferred brand drugs on the Drug List have a higher copayment or coinsurance. You may consider a preferred brand covered drug to treat your condition if you and your provider decide it is appropriate.

Non-preferred brand drugs have the highest copayment or coinsurance. The covered non-preferred brand drugs are usually more costly.

If you have questions about Medica’s Drug List or whether a specific drug is covered (and/or whether the drug is a generic, preferred brand, or non-preferred brand), or if you would like to request a copy of the Medica Drug List at no charge, call Customer Service at one of the telephone numbers listed inside the front cover of your benefit plan document.

Does the Drug List ever change?

The Medica Drug List can change during the course of a calendar year. Medica strives to limit these changes. Examples of when changes may occur include when a new generic drug or interchangeable biosimilar becomes available or when new adverse information about the safety or effectiveness of a drug is released.

Certain drugs on the Drug List may be excluded under your specific plan design. Please refer to your benefit plan document to determine specific benefit levels.

How do I use the Drug List?

There are two ways to find your drug within the Drug List:

Drug Category

The Drug List begins on Page 7. The drugs in this Drug List are grouped into categories depending on their clinical classification. For example, drugs that are considered “anti-infectives” will be listed under the “anti-infectives” category. If you know how your drug is classified, look for the category name in the list. Then look under the category name for your drug.

Alphabetical Listing

The Drug List Index provides an alphabetical list of all of the drugs included in this document. Both brand name drugs and generic drugs are listed in the Index. Look in the Index and find your drug. Next to your drug, you will see the page number where you can find coverage information. Turn to the page listed in the Index and find the name of your drug in the first column of the list.

Preventive Drug and Supply Medications (ACA)

Medications displayed with the “ACA” indicator are defined as preventive health services under the Affordable Care Act (ACA) and are provided without member cost sharing. If your benefit includes mail order, please note that some preventive drugs and supplies may not be available through this service.

Medication-Assisted Treatment (MAT)

Medications displayed with a “MAT” in the Requirements/Limits column are defined as Medication-Assisted Treatment drugs. You should refer to your benefit plan document for further information.

Diabetic Supplies (DS)

Products displayed with a “DS” in the Requirements/Limits column are defined as Diabetic Supplies. These products are covered under the diabetic supply benefit in your plan document.

Please Note: Your benefit plan defines the level of coverage.

Remember, just because a drug that you take is listed on the Drug List does not mean that your benefit plan covers that medication. If you have questions, please refer to your benefit plan document or call the Medica Customer Service phone number listed on the back of your ID card to determine what level of coverage you have.

Note: To Search the Drug List, use ctrl + F on your keyboard and type in the search term.

Are there any restrictions on my coverage?

For some prescriptions there are special requirements that must be met in order to receive coverage. These include:

Prior authorization (PA)

Certain drugs require prior authorization (approval in advance) from Medica in order to be covered. These medications are shown on the Drug List with the abbreviation "PA." The Drug List is available to providers, including pharmacies. Your network provider who prescribes the drug should initiate the prior authorization process. You will pay the entire cost of the drug received if you do not meet Medica's authorization criteria.

Step therapy (ST)

Step therapy is a process that involves trying an alternative covered drug first (typically a generic drug) before moving to a preferred brand or non-preferred brand covered drug for treatment of the same medical condition. The medications subject to step therapy are shown on the Medica Drug List with the abbreviation "ST." You must meet applicable step therapy requirements before Medica will cover these preferred brand or non-preferred brand drugs.

Quantity limits (QL)

Certain covered drugs have limits on the maximum quantity allowed per prescription over a specific time period. The medications subject to quantity limits are shown on the Medica Drug List with the abbreviation "QL." Some quantity limits are based on the manufacturer's packaging, FDA labeling or clinical guidelines.

Medical Benefit Drugs

Certain drugs fall under the medical benefits rather than pharmacy benefits. These drugs require administration by healthcare professionals in a physician's office, outpatient hospital or home infusion setting. You can find information on Medical Drug Policies on Medica's website.

Pharmacy requirement

Certain self-administered and cancer treatment medications must be obtained from a Medica-designated specialty pharmacy in order to be covered.

Can I request an exception to the coverage restrictions?

Yes. Your doctor can find the information they need to make a request on your behalf on Medica's website. To facilitate a thorough review, Medica asks that all information requested in the form be provided, including documentation of which medications have been tried and failed, including the dosages used, and the identified reason for failure (e.g. side effects, lack of efficacy).

Specialty Program (SP)

Certain drugs are available only through your Specialty Pharmacy benefit. Specialty medications are high-technology, high cost, oral or injectable drugs used for the treatment of certain diseases that require complex therapies. Many specialty medications require special handling and in most cases are prescribed by a specialist.

In order to receive a specialty medication, you must utilize Accredo Specialty Pharmacy (Medica's designated specialty pharmacy).

Limited Availability Drugs (LA)

In certain circumstances, select medications may only be available at certain pharmacies. Limited availability (LA) or limited distribution drugs (LDD) are medications that may have special dosing or lab monitoring requirements that need to be followed very closely. Because of this, the manufacturer sometimes chooses to limit the distribution of its drug to only a few pharmacies, or as part of the drug approval process the FDA may recommend this type of distribution in order for the drug to be approved. This type of restricted distribution helps the manufacturer keep track of drug inventory, properly educate dispensing pharmacists about any necessary monitoring, and ensure that any risks that are associated with the LA drugs are minimized.

Your provider typically knows where to send prescriptions for limited availability drugs, but if you have any questions, reach out to Accredo Specialty Pharmacy and they will assist you in which specialty pharmacies can dispense the drug you need.

Oral Oncology Medications

Oral drugs for the treatment of cancer are restricted to the Specialty Pharmacy Network (or LDD designated pharmacy), but are not subject to the specialty prescription drug copay. Oral oncology specialty medications are subject to the applicable outpatient prescription drug copay as outlined in your benefit plan document.

PLEASE NOTE: Reference the Specialty Drug List on Medica's website for further information.

Coverage Limitations

Proton Pump Inhibitors (PPI): Coverage limitations may apply to these medications. **Inclusion in the Medica Drug List does not imply coverage.** You should refer to your benefit plan document for further information.

Human Growth Hormones (GH): Coverage limitations may apply to these medications. **Inclusion in the Medica Drug List does not imply coverage.** You should refer to your benefit plan document for further information.

Non-Sedating Antihistamines (NSA): Coverage limitations may apply to these medications. **Inclusion in the Medica Drug List does not imply coverage.** You should refer to your benefit plan document for further information.

Erectile Dysfunction Drugs (ED): Coverage limitations may apply to these medications. **Inclusion in the Medica Drug List does not imply coverage.** You should refer to your benefit plan document for further information.

Infertility Drugs (INF): Coverage limitations may apply to these medications. **Inclusion in the Medica Drug List does not imply coverage.** You should refer to your benefit plan document for further information.

Abbreviations

Coverage Notes and Restrictions Abbreviations		
Abbreviation/Note	Description	Explanation
PA	Prior Authorization Restriction	Your healthcare provider is required to get prior authorization from Medica before you fill your prescription for this drug. Without prior approval, Medica may not cover this drug.
QL	Quantity Limit Restriction	Medica limits the amount of this drug that is covered per prescription, or within a specific time frame.
ST	Step Therapy Restriction	Before Medica will provide coverage for this drug, you must first try another drug(s) to treat your medical condition. This drug may only be covered if the other drug(s) does not work for you.
Other Special Requirements for Coverage		
Tier 1 = Preferred Generics	This prescription is available at your Preferred Generic benefit.	
Tier 2 = Generics	This prescription is available at your Generic benefit.	
Tier 3 = Preferred Brands	This prescription is available at your Preferred Brand benefit.	
Tier 4 = Non-Preferred Brands	This prescription is available at your Non-Preferred Brand benefit.	
Tier 5 = Specialty Prescription Drugs	This prescription is available at your Specialty benefit.	
Tier 6 = ACA Preventive Drugs	This prescription is available at your Preventive Health Service benefit.	

*Standardized plans may assess all generic drugs at a single generic benefit

This Guidebook includes information accurate at the time it was collected from Express Scripts' systems and may not reflect actual benefit setup details at later times.
